

The Asbestos Program of the Air Pollution Control Division (APCD) is in the process of undergoing a legislatively-mandated (24-34-104(8)(a), C.R.S.) Sunset Review required under 25-7-512, C.R.S. This review is conducted to analyze and evaluate the performance of the program to determine whether there is a need for the regulation provided under Part 5 of Article 7 of Title 25, C.R.S. The results of the review will be contained in a report which will also discuss the effectiveness of the Air Pollution Control Division in carrying out the intent of the statutes and makes recommendations for statutory and administrative changes in the event this regulatory program is continued by the General Assembly.

The Colorado Department of Regulatory Agencies (DORA) has assigned Bryan Jameson to conduct the review of the asbestos program. Bryan will be contacting various entities who are either active in or impacted by the asbestos industry in Colorado, but he would also welcome being contacted by anyone who would like to speak with him about the APCD's Asbestos Program. Bryan's contact information is below:

Bryan Jameson
