Colorado Department  
of Public Health  
and Environment

**OPERATING PERMIT**

CANYON GAS RESOURCES, INC.  
GREASEWOOD GAS PLANT

ISSUED MARCH 1, 1998  
LAST REVISED OCTOBER 31, 2001

# AIR POLLUTION CONTROL DIVISION COLORADO OPERATING PERMIT

---

FACILITY NAME: Greasewood Gas Conditioning Plant OPERATING PERMIT NUMBER  
FACILITY ID: 1030004 **95OPRB018**  
ISSUE DATE: March 1, 1998  
EXPIRATION DATE: March 1, 2003  
MODIFICATIONS: See Appendix F of Permit

Issued in accordance with the provisions of Colorado Air Pollution Prevention and Control Act, 25-7-101 et seq. (1989 & 1995 Supp.) and applicable rules and regulations.

ISSUED TO: Canyon Gas Resources, Inc.  
8080 North Central Expressway, Suite 900  
Dallas, TX 75206

PLANT SITE LOCATION: Section 5, T2S, R96W  
Rangely, Rio Blanco County

## INFORMATION RELIED UPON

Operating Permit Application Received: December 30, 1994  
And Additional Information Received: August 1, 1995 and June 19, 1997

Nature of Business: Gas gathering and natural gas liquids production  
Primary SIC: 1321

## RESPONSIBLE OFFICIAL

Name: Danny L. Thompson  
Title: VP Engineering and Operations

## FACILITY CONTACT PERSON

Name: Andrea McMillen  
Title: Environmental Compliance Specialist

Phone: (214) 750-9223

Phone: (972) 367-2644

---

## SUBMITTAL DEADLINES

Semi-Annual Monitoring Period: March - August, September - February  
Semi-Annual Monitoring Report: October 1, 1998 & April 1, 1999 and subsequent years)  
Annual Compliance Period: Begins March 1 through February 28 or 29  
Annual Compliance Certification: April 1, 1999 and subsequent years

## SECTION I - General Activities and Summary

### 1. Permitted Activities

1.1 The Greasewood Gas Conditioning Plant is a natural gas processing plant designed to compress natural gas and separate moisture and natural gas liquids from the gas stream prior to transmission to sales pipelines. The plant equipment includes four natural gas-fired engine driven compressors and natural gas liquids recovery facilities. Natural gas liquids are recovered using a quick cycle plant that includes a three-tower silica absorber and a natural gas fired salt bath heater.

The facility is located in a rural area northwest of Rio Blanco in Rio Blanco county. The area in which the plant operates is designated as attainment for all criteria pollutants.

The state of Utah is located within 50 miles of the plant. Flat Tops Wilderness is a Federal Class I designated area located within 100 kilometers of the plant. Dinosaur National Monument is a Colorado Category I area located within 100 kilometers of the plant.

1.2 Until such time as this permit expires or is modified or revoked, the permittee is allowed to discharge air pollutants from this facility in accordance with the requirements, limitations, and conditions of this permit.

1.3 This Operating Permit replaces Colorado Construction Permit(s): C-11,195 and 89RB300.

1.4 All conditions in this permit are enforceable by US Environmental Protection Agency, Colorado Air Pollution Control Division (hereinafter Division) and its agents, and citizens unless otherwise specified. All information gathered pursuant to the requirements of this permit is subject to the Recordkeeping and Reporting requirements listed under Condition 21 of the General Conditions in Section IV of this permit. **State-only enforceable conditions are:**

Permit Condition Number(s): Section IV- Conditions 13 and 17

1.5 The following Operating Permits are associated with this facility for purposes of determining applicability of Prevention of Significant Deterioration regulations: None.

### 2. Alternative Operating Scenarios

The following Alternative Operating Scenario (AOS) for temporary engine replacement has been reviewed in accordance with the requirements of Regulation No. 3., Part A, Section IV.A, Operational Flexibility-Alternative Operating Scenarios, and Regulation No. 3, Part B, Construction Permits, and has been found to meet all applicable substantive and procedural requirements. This permit incorporates and shall be considered a construction permit for any engine replacement performed in accordance with this AOS, and the permittee shall be allowed to perform such engine replacement without applying for a revision to this permit or obtaining a new Construction Permit.

For purposes of Regulation No. 3, Part B, Section IV.G.4.a., any engine replacement authorized under this AOS shall commence operation upon notation of same in the contemporaneous log as required below. Results of any testing required below shall be normalized for comparison to the applicable permitted emission limits.

## 2.1 Temporary Engine Replacement

The following AOS is incorporated into this permit in order to deal with a compressor engine breakdown or periodic routine maintenance and repair which requires the use of a temporary replacement engine. "Temporary" is defined as in the same service for 270 operating days or less in any 12 month period. The 270 days is the total number of days that the engine is in operation. If the engine operates only part of a day, that day counts towards the 270 day total. Note that the compliance demonstrations made as part of this AOS are in addition to any compliance demonstrations required by the permit.

2.1.1 The permittee may temporarily replace an existing compressor engine that is subject to the emission limits set forth in this permit with an engine that is of the same manufacturer, model, and horsepower or a different manufacturer, model, or horsepower as the existing engine without modifying this permit.

The permittee shall measure nitrogen oxide (NO<sub>x</sub>) and carbon monoxide (CO) emissions in the exhaust from the temporary replacement engine using a portable flue gas analyzer within seven (7) calendar days of commencing operation of the temporary replacement engine. Calibration of the analyzer shall be conducted according to manufacturer's instructions.

In the absence of evidence to the contrary, results of the portable flue gas analyzer test shall be evidence of enforceable compliance or noncompliance of the temporary replacement engine with the emission limitations of the original engine.

An exceedance of either the NO<sub>x</sub> or CO emission limitation during the initial portable flue gas analyzer test shall require a subsequent portable flue gas analyzer test indicating compliance with both the NO<sub>x</sub> and CO emission limitations within 14 calendar days of commencing operation of the replacement engine. Calibration gases shall be used to calibrate the portable analyzer for all tests conducted subsequent to the initial test.

If portable flue gas analyzer results indicate compliance with both the NO<sub>x</sub> and CO emission limitations within the 14 day period, the temporary replacement engine will be considered to be in compliance for purposes of this AOS from the time that the replacement engine commenced operation until the replacement engine is taken off line.

If portable flue gas analyzer results fail to indicate the compliance with either the NO<sub>x</sub> or CO emission limitations within the 14 day period, the source will notify the Division in writing within 10 calendar days of the end of the 14 day period. In the absence of evidence to the contrary, the temporary replacement engine will be considered to be out of compliance from the time that the temporary replacement engine commenced operation until the engine is taken off line. Results of all testing that indicates noncompliance shall be submitted to the Division within 10 calendar days of the end of the 14 day period.

- 2.1.2 The permittee may temporarily replace a grandfathered or permit exempt engine or an engine that is not subject to emission limits without modifying this permit. Potential emissions from the temporary replacement engine must be less than or equal to the potential emissions from the original grandfathered or permit exempt engine or for the engine that is not subject to emission limits, as determined by applying appropriate emission factors.
- 2.1.3 Temporary replacement engines, whether of the same manufacturer, model, and horsepower, or of a different manufacturer, model, or horsepower, are subject to all federally applicable and state-only requirements set forth in this permit (including monitoring and record keeping), and shall be subject to any shield afforded by this permit.
- 2.1.4 The permittee shall maintain a log on-site to contemporaneously record the start and stop date of any temporary engine replacement, the manufacturer, model number, horsepower, and serial number of the engine(s) that are temporarily replaced during the term of this permit, and the manufacturer, model number, horsepower, and serial number of the replacement engine.
- 2.1.5 Results of all tests conducted pursuant to this AOS shall be kept on site for five (5) years and made available to the Division upon request.
- 2.1.6 For comparison with an annual or short term emissions limit, the results of any testing required by this AOS shall be converted to a lb/hr basis and multiplied by the allowable operating hours in the month or year (whichever applies) in order to monitor compliance. If a source is not limited in its hours of operation, the test results shall be multiplied by the maximum number of hours in the month or year (8760), whichever applies.

## 2.2 **Additional Sources**

Current State Air Quality Regulations do not allow for advanced New Source Review in the absence of discrete and verifiable information concerning future installations. Therefore, any additional operational changes requiring new equipment at this facility not addressed by these Alternative Operating Scenarios will need to undergo appropriate Regulation No. 3 review procedures.

### 3. Summary of Emission Units

3.1 The emissions units regulated by this permit are the following:

Emission Unit Number	AIRS Stack Number	Facility Identifier	Description	Pollution Control Device
P001	001	S001	Waukesha Model 7042GL 954 HP Natural Gas Fired Internal Combustion Engine, 4-Cycle, Lean Burn, Serial Number 295478.	None
P002A&B	002	S002A&B	Two (2) Ingersol-Rand Model 62SVG 253 HP Natural Gas Fired Internal Combustion Engines, 4-Cycle, Rich Burn, Serial Numbers 6CS555 and 6CS553.	None
P004	004	S004	Ingersol-Rand Model 83KVGA 855 HP Natural Gas Fired Internal Combustion Engine, 4-Cycle, Rich Burn, Serial Number 83PLT903.	None
F005	005	S005	Facility Fugitive Volatile Organic Compound Emissions	None

**SECTION II - Specific Permit Terms**

**1. P001 - Waukesha 954 HP Internal Combustion Engine**

Parameter	Permit Condition Number	Limitations		Compliance Emission Factor	Monitoring	
		Short Term	Long Term		Method	Interval
Emissions Calculation	1.1	N/A	N/A	NOx-16.0 g/hp-hr CO-28.0 g/hp-hr VOC-1.5 g/hp-hr	Calculation	Annually
Horsepower-Hours	1.2	N/A	N/A	N/A	Recordkeeping	Monthly
Opacity	1.3	Less than or equal to 20%		N/A	Fuel Use Restriction	Annually

1.1 The emission factors listed above have been approved by the Division and shall be used to calculate emissions from this unit (manufacturer's emission data). This unit is subject to the General Conditions in Section IV of this Permit, including Recordkeeping and Reporting requirements listed under Condition 21 and Fee Payment under Condition 7.

1.2 Hours of Operation shall be monitored monthly and recorded in a log to be made available to the Division upon request. Recorded data shall be multiplied by the Compliance Emission Factors and maximum rated horsepower to calculate emissions for determination of annual fees.

1.3 Opacity of emissions from this engine shall not exceed 20% (Colorado Regulation No. 1, Section II.A.1). In the absence of credible evidence to the contrary, compliance with the 20% opacity limit shall be presumed whenever natural gas is used as fuel for the engine.

1.4 This engine shall be operated and maintained in accordance with internal operating and maintenance standards, which shall consider manufacturer's recommendations and industry standard practices, at all times, including periods of start-up, shutdown, and malfunction.

**2. P002 - Two (2) Ingersol-Rand 253 HP Internal Combustion Engines**

Parameter	Permit Condition Number	Limitations		Compliance Emission Factor(Each Engine)	Monitoring	
		Short Term	Long Term		Method	Interval
Emissions Calculation	2.1	N/A	N/A	NOx-10 g/hp-hr CO-8.6 g/hp-hr VOC-0.14 g/hp-hr	Calculation	Annually
Horsepower-Hours	2.2	N/A	N/A	N/A	Recordkeeping	Annually
Opacity	2.3	Less than or equal to 20%		N/A	Fuel Use Restriction	Annually

2.1 The emission factors listed above have been approved by the Division and shall be used to calculate emissions from these units (AP-42, Table 3.2-2, 1/95). These units are subject to the General Conditions in Section IV of this Permit, including Recordkeeping and Reporting requirements listed under Condition 21 and Fee Payment under Condition 7.

2.2 Hours of Operation of each engine shall be monitored annually and recorded in a log to be made available to the Division upon request. Recorded data shall be multiplied by the Compliance Emission Factors and maximum site rated horsepower to calculate emissions for determination of annual fees.

2.3 Opacity of emissions from each engine shall not exceed 20% (Colorado Regulation No. 1, Section II.A.1). In the absence of credible evidence to the contrary, compliance with the 20% opacity limit shall be presumed whenever natural gas is used as fuel for the engines.

2.4 This engine shall be operated and maintained in accordance with internal operating and maintenance standards, which shall consider manufacturer's recommendations and industry standard practices, at all times, including periods of start-up, shutdown, and malfunction.

**3. P004 - Ingersol-Rand 855 HP Internal Combustion Engine**

Parameter	Permit Condition Number	Limitations		Compliance Emission Factor	Monitoring	
		Short Term	Long Term		Method	Interval
Emissions Calculation	3.1	N/A	N/A	NOx-10 g/hp-hr CO-8.6 g/hp-hr VOC-0.14 g/hp-hr	Calculation	Annually
Horsepower-Hours	3.2	N/A	N/A	N/A	Recordkeeping	Annually
Opacity	3.3	Less than or equal to 20%		N/A	Fuel Use Restriction	Annually

3.1 The emission factors listed above have been approved by the Division and shall be used to calculate emissions from this unit (AP-42, Table 3.2-2, 1/95). This unit is subject to the General Conditions in Section IV of this Permit, including Recordkeeping and Reporting requirements listed under Condition 21 and Fee Payment under Condition 7.

3.2 Hours of Operation shall be monitored annually and recorded in a log to be made available to the Division upon request. Recorded data shall be multiplied by the Compliance Emission Factors and maximum site rated horsepower to calculate emissions for determination of annual fees.

3.3 Opacity of emissions from this engine shall not exceed 20% (Colorado Regulation No. 1, Section II.A.1). In the absence of credible evidence to the contrary, compliance with the 20% opacity limit shall be presumed whenever natural gas is used as fuel for the engine.

3.4 This engine shall be operated and maintained in accordance with internal operating and maintenance standards, which shall consider manufacturer's recommendations and industry standard practices, at all times, including periods of start-up, shutdown, and malfunction.

**4. F005 - Facility Fugitive VOC Emissions**

Parameter	Permit Condition Number	Limitations		Compliance Emission Factor	Monitoring	
		Short Term	Long Term		Method	Interval
Emissions Calculation	4.1.	N/A	N/A	By Component - EPA Protocol for Equipment Leak Estimates	Recordkeeping	Annual Certification

4.1 Emissions shall be calculated using the emission factors and equations listed below. A component count shall be maintained and adjusted annually to determine the existing hardware inventory. This can be accomplished by conducting an actual component count before the permit is issued and then maintaining records of component additions and deletions.

Emission Factors for individual types of components in lbs/component-hr (Baseline Emission Factors from EPA, August 1995):

	<u>Gas</u>	<u>Condensate</u>
Valves	9.92E-03	5.51E-03
Relief Valves	1.94E-02	1.65E-02
Compressor Seals	1.94E-02	1.65E-02
Flanges	8.60E-04	2.43E-04
Open-ended Lines	4.41E-03	3.09E-03
Pump Seals	5.29E-03	2.86E-02
Connectors	4.41E-04	4.63E-04

Annual Emissions of VOC per Component:

(Component Count) H (8760 hrs/year) H (%VOC in Organic Portion of Gas Stream) H  
 (Component Emission Factor)

Total fugitive VOC emissions will be the sum of emissions for each component.

A gas analysis shall be conducted annually. The results of this analysis shall be used to determine the appropriate %VOC to use in the above equation.

**SECTION III - Permit Shield**

Regulation No. 3, 5 CCR 1001-5, Part A, § I.B.43; Part C, §§ V.C.1.b. & D., XIII; §§ 25-7-111(2)(I), 25-7-114.4(3)(a), C.R.S.

**1. Specific Conditions**

The following parameters and requirements have been specifically identified as non-applicable to the facility to which this permit has been issued:

Emission Unit Description & Number	Applicable Requirement	Justification
Facility	40CFR60 Subparts K and Ka adopted by reference in Colorado Regulation No. 6, Part A	These subparts apply to vessels used for storage of petroleum liquids. The materials stored at the Greasewood Plant do not meet the definition of petroleum liquids.
Distillate Storage Vessel (30,000 gallons)	40CFR60 Subpart Kb adopted by reference in Colorado Regulation No. 6, Part A	This subpart is not applicable because the installation of this tank at the Greasewood Plant predates the promulgation of Subpart Kb.
P001, P002, P004, F005	40CFR60 Subpart KKK adopted by reference in Colorado Regulation No. 6, Part A	This subpart is not applicable because the installation of these components at the Greasewood Plant predates the promulgation of Subpart KKK.

**2. General Conditions**

Compliance with this Operating Permit shall be deemed compliance with all applicable requirements specifically identified in the permit and other requirements specifically identified in the permit as not applicable to the source. This permit shield shall not alter or affect the following:

- 2.1 The provisions of §§ 25-7-112 and 25-7-113, C.R.S., or § 303 of the federal act, concerning enforcement in cases of emergency;
- 2.2 The liability of an owner or operator of a source for any violation of applicable requirements prior to or at the time of permit issuance;
- 2.3 The applicable requirements of the federal Acid Rain Program, consistent with § 408(a) of the federal act;
- 2.4 The ability of the Air Pollution Control Division to obtain information from a source pursuant to § 25-7-111(2)(I), C.R.S., or the ability of the Administrator to obtain information pursuant to § 114 of the federal act;
- 2.5 The ability of the Air Pollution Control Division to reopen the Operating Permit for cause pursuant to Regulation No. 3, Part C, § XIII.

2.6 Sources are not shielded from terms and conditions that become applicable to the source subsequent to permit issuance.

---

**SECTION IV - General Permit Conditions**

**1. Administrative Changes**

Regulation No. 3, 5 CCR 1001-5, Part A, §§ III.

The permittee shall submit an application for an administrative permit amendment to the Division for those permit changes that are described in Regulation No. 3, Part A, ¶ I.B.36.a. The permittee may immediately make the change upon submission of the application to the Division.

**2. Certification Requirements**

Regulation No. 3, 5 CCR 1001-5, Part C, §§ III.B.9., V.C.16.a.&e. and V.C.17.

- a. Any application, report, document and compliance certification submitted to the Air Pollution Control Division pursuant to Regulation No. 3 or the Operating Permit shall contain a certification by a responsible official of the truth, accuracy and completeness of such form, report or certification stating that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate and complete.
- b. All compliance certifications for terms and conditions in the Operating Permit shall be submitted to the Air Pollution Control Division at least annually unless a more frequent period is specified in the applicable requirement or by the Division in the Operating Permit.
- c. Compliance certifications shall contain:
  - (i) the identification of each permit term and condition that is the basis of the certification;
  - (ii) the compliance status of the source;
  - (iii) whether compliance was continuous or intermittent;
  - (iv) the method(s) used for determining the compliance status of the source, currently and over the reporting period; and
  - (v) such other facts as the Air Pollution Control Division may require to determine the compliance status of the source.
- d. All compliance certifications shall be submitted to the Air Pollution Control Division and to the Environmental Protection Agency at the addresses listed in Appendix D of this Permit.
- e. If the permittee is required to develop and register a risk management plan pursuant to § 112(r) of the federal act, the permittee shall certify its compliance with that requirement; the Operating Permit shall not incorporate the contents of the risk management plan as a permit term or condition.

**3. Compliance Requirements**

Regulation No. 3, 5 CCR 1001-5, Part C, §§ III.C.9., V.C.11. & 16.d., § 25-7-122.1(2), C.R.S.

- a. The permittee must comply with all conditions of the Operating Permit. Any permit noncompliance relating to federally-enforceable terms or conditions constitutes a violation of the federal act, as well as the state act and Regulation No. 3. Any permit noncompliance relating to state-only terms or conditions constitutes a violation of the state act and Regulation No. 3, shall be enforceable pursuant to state law, and shall not be enforceable by citizens under § 304 of the federal act. Any such violation of the federal act, the

- state act or regulations implementing either statute is grounds for enforcement action, for permit termination, revocation and reissuance or modification or for denial of a permit renewal application.
- b. It shall not be a defense for a permittee in an enforcement action or a consideration in favor of a permittee in a permit termination, revocation or modification action or action denying a permit renewal application that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of the permit.
  - c. The permit may be modified, revoked, reopened, and reissued, or terminated for cause. The filing of any request by the permittee for a permit modification, revocation and reissuance, or termination, or any notification of planned changes or anticipated noncompliance does not stay any permit condition, except as provided in §§ X. and XI. of Regulation No. 3, Part C.
  - d. The permittee shall furnish to the Air Pollution Control Division, within a reasonable time as specified by the Division, any information that the Division may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating the permit or to determine compliance with the permit. Upon request, the permittee shall also furnish to the Division copies of records required to be kept by the permittee, including information claimed to be confidential. Any information subject to a claim of confidentiality shall be specifically identified and submitted separately from information not subject to the claim.
  - e. Any schedule for compliance for applicable requirements with which the source is not in compliance at the time of permit issuance shall be supplemental, and shall not sanction noncompliance with, the applicable requirements on which it is based.
  - f. For any compliance schedule for applicable requirements with which the source is not in compliance at the time of permit issuance, the permittee shall submit, at least every 6 months unless a more frequent period is specified in the applicable requirement or by the Air Pollution Control Division, progress reports which contain the following:
    - (i) dates for achieving the activities, milestones, or compliance required in the schedule for compliance, and dates when such activities, milestones, or compliance were achieved; and
    - (ii) an explanation of why any dates in the schedule of compliance were not or will not be met, and any preventive or corrective measures adopted.
  - g. The permittee shall not knowingly falsify, tamper with, or render inaccurate any monitoring device or method required to be maintained or followed under the terms and conditions of the Operating Permit.

#### 4. Emergency Provisions

Regulation No. 3, 5 CCR 1001-5, Part C, § VII.

An emergency means any situation arising from sudden and reasonably unforeseeable events beyond the control of the source, including acts of God, which situation requires immediate corrective action to restore normal operation, and that causes the source to exceed the technology-based emission limitation under the permit due to unavoidable increases in emissions attributable to the emergency. "Emergency" does not include noncompliance to the extent caused by improperly designed equipment, lack of preventative maintenance, careless or improper operation, or operator error. An emergency constitutes an affirmative defense to an enforcement action brought for noncompliance with a technology-based emission limitation if the permittee demonstrates, through properly signed, contemporaneous operating logs, or other relevant evidence that:

- a. an emergency occurred and that the permittee can identify the cause(s) of the emergency;

- b. the permitted facility was at the time being properly operated;
- c. during the period of the emergency the permittee took all reasonable steps to minimize levels of emissions that exceeded the emission standards, or other requirements in the permit; and
- d. the permittee submitted oral notice of the emergency to the Air Pollution Control Division no later than noon of the next working day following the emergency, and followed by written notice within one month of the time when emissions limitations were exceeded due to the emergency. This notice must contain a description of the emergency, any steps taken to mitigate emissions, and corrective actions taken.

This emergency provision is in addition to any emergency or upset provision contained in any applicable requirement.

#### **5. Emission Standards for Asbestos**

Regulation No. 8, 5 CCR 1001-10, Part B

The permittee shall not conduct any asbestos abatement activities except in accordance with the provisions of Regulation No. 8, Part B, "emission standards for asbestos."

#### **6. Emissions Trading, Marketable Permits, Economic Incentives**

Regulation No. 3, 5 CCR 1001-5, Part C, § V.C.13.

No permit revision shall be required under any approved economic incentives, marketable permits, emissions trading and other similar programs or processes for changes that are specifically provided for in the permit.

#### **7. Fee Payment**

Regulation No. 3, 5 CCR 1001-5, Part A, § VI.; Part C, § V.C.12.

- a. The permittee shall pay an annual emissions fee in accordance with Regulation No. 3, Part A, Section VI. A 1% per month late payment fee shall be assessed against any invoice amounts not paid in full on the 91st day after the date of invoice, unless a permittee has filed a timely protest to the invoice amount.
- b. The permittee shall pay a permit processing fee of \$50 per hour. If the Division estimates that processing of the permit will take more than 30 hours, it will notify the permittee of its estimate of what the actual charges may be prior to commencing any work exceeding the 30 hour limit.
- c. The permittee shall pay an APEN fee of \$100 for each APEN or revised APEN filed.

#### **8. Fugitive Particulate Emissions**

Regulation No. 1, 5 CCR 1001-3, § III.D.1.

The permittee shall employ such control measures and operating procedures as are necessary to minimize fugitive particulate emissions into the atmosphere, in accordance with the provisions of Regulation No. 1, § III.D.1.

#### **9. Inspection and Entry**

Regulation No. 3, 5 CCR 1001-5, Part C, § V.C.16.b.

Upon presentation of credentials and other documents as may be required by law, the permittee shall allow the Air Pollution Control Division, or any authorized representative, to perform the following:

- a. enter upon the permittee's premises where an Operating Permit source is located, or emissions-related activity is conducted, or where records must be kept under the terms of the permit;
- b. have access to, and copy, at reasonable times, any records that must be kept under the conditions of the permit;
- c. inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under the Operating Permit;
- d. sample or monitor at reasonable times, for the purposes of assuring compliance with the Operating Permit or applicable requirements, any substances or parameters.

#### **10. Minor Permit Modifications**

Regulation No. 3, 5 CCR 1001-5, Part C, §§ X. & XI.

The permittee shall submit an application for a minor permit modification before making the change requested in the application. The permit shield shall not extend to minor permit modifications.

#### **11. New Source Review**

Regulation No. 3, 5 CCR 1001-5, Part B

The permittee shall not commence construction or modification of a source required to be reviewed under the New Source Review provisions of Regulation No. 3, Part B, without first receiving a construction permit.

#### **12. No Property Rights Conveyed**

Regulation No. 3, 5 CCR 1001-5, Part C, § V.C.11.d.

This permit does not convey any property rights of any sort, or any exclusive privilege.

#### **13. Odor**

Regulation No. 2, 5 CCR 1001-3

As a matter of state law only, the permittee shall comply with the provisions of Regulation No. 2 concerning odorous emissions.

#### **14. Off-Permit Changes to the Source**

Regulation No. 3, 5 CCR 1001-5, Part C, § XII.B.

The permittee shall record any off-permit change to the source that causes the emissions of a regulated pollutant subject to an applicable requirement, but not otherwise regulated under the permit, and the emissions resulting from the change, including any other data necessary to show compliance with applicable ambient air quality standards. The permittee shall provide contemporaneous notification to the Air Pollution Control Division and to the Environmental Protection Agency at the addresses listed in Appendix D of this Permit . The permit shield shall not apply to any off-permit change.

**15. Opacity**

Regulation No. 1, 5 CCR 1001-3, §§ I., II.

The permittee shall comply with the opacity emissions limitation set forth in Regulation No. 1, §§ I.-II.

**16. Open Burning**

Regulation No. 1, 5 CCR 1001-3, §§ II.C.1.

The permittee shall obtain a permit from the Division for any regulated open burning activities in accordance with provisions of Regulation No. 1, §§ II.C.1.

**17. Ozone Depleting Compounds**

Regulation No. 15, 5 CCR 1001-17

As a matter of state law only, the permittee shall comply with the provisions of Regulation No. 15 concerning emissions of ozone depleting compounds.

**18. Permit Expiration and Renewal**

Regulation No. 3, 5 CCR 1001-5, Part C, §§ III.B.6., IV.C., V.C.2.

- a. The permit term shall be five (5) years. The permit shall expire at the end of its term. Permit expiration terminates the permittee's right to operate unless a timely and complete renewal application is submitted.
- b. Applications for renewal shall be submitted at least twelve months, but not more than 18 months, prior to the expiration of the Operating Permit. An application for permit renewal may address only those portions of the permit that require revision, supplementing, or deletion, incorporating the remaining permit terms by reference from the previous permit. A copy of any materials incorporated by reference must be included with the application.

**19. Portable Sources**

Regulation No. 3, 5 CCR 1001-5, Part C, § II.D.

Portable Source permittees shall notify the Air Pollution Control Division at least 10 days in advance of each change in location.

**20. Prompt Deviation Reporting**

Regulation No. 3, 5 CCR 1001-5, Part C, § V.C.7.b.

The permittee shall promptly report any deviation from permit requirements, including those attributable to upset conditions as defined in the permit, the probable cause of such deviations, and any corrective actions or preventive measures taken. Unless required by a permit term or condition to report deviations on a more frequent basis, "prompt" reporting shall entail submission of reports of deviations from permit requirements every six (6) months in accordance with paragraph 21.d. below. "Prompt reporting" does not constitute an exception to the requirements of "Emergency Provisions" for the purpose of avoiding enforcement actions.

## 21. Record Keeping and Reporting Requirements

Regulation No. 3, 5 CCR 1001-5, Part A, § II.; Part C, §§ V.C.6., V.C.7.

- a. Unless otherwise provided in the source specific conditions of this Operating Permit, the permittee shall maintain compliance monitoring records that include the following information:
  - (i) date, place as defined in the Operating Permit, and time of sampling or measurements;
  - (ii) date(s) on which analyses were performed;
  - (iii) the company or entity that performed the analysis;
  - (iv) the analytical techniques or methods used;
  - (v) the results of such analysis; and
  - (vi) the operating conditions at the time of sampling or measurement.
- b. The permittee shall retain records of all required monitoring data and support information for a period of at least five (5) years from the date of the monitoring sample, measurement, report or application. Support information, for this purpose, includes all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by the Operating Permit. With prior approval of the Air Pollution Control Division, the permittee may maintain any of the above records in a computerized form.
- c. Permittees must retain records of all required monitoring data and support information for the most recent twelve (12) month period, as well as compliance certifications for the past five (5) years on-site at all times. A permittee shall make available for the Air Pollution Control Division's review all other records of required monitoring data and support information required to be retained by the permittee upon 48 hours advance notice by the Division.
- d. The permittee shall submit to the Air Pollution Control Division all reports of any required monitoring at least every six (6) months, unless an applicable requirement, the enhanced monitoring rule, or the Division requires submission on a more frequent basis. All instances of deviations from any permit requirements must be clearly identified in such reports.
- e. The permittee shall file an Air Pollutant Emissions Notice ("APEN") prior to constructing, modifying, or altering any facility, process, activity which constitutes a stationary source from which air pollutants are or are to be emitted, unless such source is exempt from the APEN filing requirements of Regulation No. 3, Part A, § II.D. A revised APEN shall be filed annually whenever a significant change in emissions, as defined in Regulation No. 3, Part A, § II.C.2., occurs; whenever there is a change in owner or operator of any facility, process, or activity; whenever new control equipment is installed; whenever a different type of control equipment replaces an existing type of control equipment; whenever a permit limitation must be modified; or before the APEN expires. An APEN is valid for a period of five years. The five-year period recommences when a revised APEN is received by the Air Pollution Control Division. Revised APENs shall be submitted no later than 30 days before the five-year term expires. Permittees submitting revised APENs to inform the Division of a change in actual emission rates must do so by April 30 of the following year. Where a permit revision is required, the revised APEN must be filed along with a request for permit revision. APENs for changes in control equipment must be submitted before the change occurs. Annual fees are based on the most recent APEN on file with the Division.

## 22. Reopenings for Cause

### Regulation No. 3, 5 CCR 1001-5, Part C, § XIII.

- a. The Air Pollution Control Division shall reopen, revise, and reissue Operating Permits; permit reopenings and reissuance shall be processed using the procedures set forth in Regulation No. 3, Part C, § III., except that proceedings to reopen and reissue permits affect only those parts of the permit for which cause to reopen exists.
- b. The Division shall reopen a permit whenever additional applicable requirements become applicable to a major source with a remaining permit term of three or more years, unless the effective date of the requirements is later than the date on which the permit expires, or unless a general permit is obtained to address the new requirements; whenever additional requirements (including excess emissions requirements) become applicable to an affected source under the acid rain program; whenever the Division determines the permit contains a material mistake or that inaccurate statements were made in establishing the emissions standards or other terms or conditions of the permit; or whenever the Division determines that the permit must be revised or revoked to assure compliance with an applicable requirement.
- c. The Division shall provide 30 days' advance notice to the permittee of its intent to reopen the permit, except that a shorter notice may be provided in the case of an emergency.
- d. The permit shield shall extend to those parts of the permit that have been changed pursuant to the reopening and reissuance procedure.

## 23. Section 502(b)(10) Changes

### Regulation No. 3, 5 CCR 1001-5, Part C, § XII.A.

The permittee shall provide a minimum 7-day advance notification to the Air Pollution Control Division and to the Environmental Protection Agency at the addresses listed in Appendix D of this Permit. The permittee shall attach a copy of each such notice given to its Operating Permit.

## 24. Severability Clause

### Regulation No. 3, 5 CCR 1001-5, Part C, § V.C.10.

In the event of a challenge to any portion of the permit, all emissions limits, specific and general conditions, monitoring, record keeping and reporting requirements of the permit, except those being challenged, remain valid and enforceable.

## 25. Significant Permit Modifications

### Regulation No. 3, 5 CCR 1001-5, Part C, §III.B.2.

The permittee shall not make a significant modification required to be reviewed under Regulation No. 3, Part B ("Construction Permit" requirements) without first receiving a construction permit. The permittee shall submit a complete Operating Permit application or application for an Operating Permit revision for any new or modified source within twelve months of commencing operation, to the address listed in Item 1 in Appendix D of this permit. If the permittee chooses to use the "Combined Construction/Operating Permit" application procedures of Regulation No. 3, Part C, then the Operating Permit must be received prior to commencing construction of the new or modified source.

**26. Special Provisions Concerning the Acid Rain Program**

Regulation No. 3, 5 CCR 1001-5, Part C, §§ V.C.1.b. & 8

- a. Where an applicable requirement of the federal act is more stringent than an applicable requirement of regulations promulgated under Title IV of the federal act, 40 Code of Federal Regulations (CFR) Part 72, both provisions shall be incorporated into the permit and shall be federally enforceable.
- b. Emissions exceeding any allowances that the source lawfully holds under Title IV of the federal act or the regulations promulgated thereunder, 40 CFR Part 72, are expressly prohibited.

**27. Transfer or Assignment of Ownership**

Regulation No. 3, 5 CCR 1001-5, Part C, § II.C.

No transfer or assignment of ownership of the Operating Permit source will be effective unless the prospective owner or operator applies to the Air Pollution Control Division on Division-supplied Administrative Permit Amendment forms, for reissuance of the existing Operating Permit. No administrative permit shall be complete until a written agreement containing a specific date for transfer of permit, responsibility, coverage, and liability between the permittee and the prospective owner or operator has been submitted to the Division.

**28. Volatile Organic Compounds**

Regulation No. 7, 5 CCR 1001-9, §§ III & V.

- a. For sources located in an ozone non-attainment area or the Denver Metro Attainment Maintenance Area, all storage tank gauging devices, anti-rotation devices, accesses, seals, hatches, roof drainage systems, support structures, and pressure relief valves shall be maintained and operated to prevent detectable vapor loss except when opened, actuated, or used for necessary and proper activities (e.g. maintenance). Such opening, actuation, or use shall be limited so as to minimize vapor loss.

Detectable vapor loss shall be determined visually, by touch, by presence of odor, or using a portable hydrocarbon analyzer. When an analyzer is used, detectable vapor loss means a VOC concentration exceeding 10,000 ppm. Testing shall be conducted as in Regulation No. 7, Section VIII.C.3.

Except when otherwise provided by Regulation No. 7, all volatile organic compounds, excluding petroleum liquids, transferred to any tank, container, or vehicle compartment with a capacity exceeding 212 liters (56 gallons), shall be transferred using submerged or bottom filling equipment. For top loading, the fill tube shall reach within six inches of the bottom of the tank compartment. For bottom-fill operations, the inlet shall be flush with the tank bottom.

- b. The permittee shall not dispose of volatile organic compounds by evaporation or spillage unless Reasonably Available Control Technology (RACT) is utilized.

**29. Wood Stoves and Wood burning Appliances**

Regulation No. 4, 5 CCR 1001-6

The permittee shall comply with the provisions of Regulation No. 4 concerning the advertisement, sale, installation, and use of wood stoves and wood burning appliances.

## OPERATING PERMIT APPENDICES

A - INSPECTION INFORMATION

B - COMPLIANCE MONITORING REPORT FORMAT

C - COMPLIANCE CERTIFICATION REPORT FORMAT

D - NOTIFICATION ADDRESSES

E - PERMIT ACRONYMS

F - PERMIT MODIFICATIONS

**\*DISCLAIMER:**

None of the information found in these Appendices shall be considered to be State or Federally enforceable, except as otherwise provided in the permit, and is presented to assist the source, permitting authority, inspectors, and citizens.

---

## APPENDIX A - Inspection Information

### Directions to Plant:

The facility is located northwest of Rio Blanco in Rio Blanco county. It is situated 6 miles north of Piceance Creek on the Collins Gulch Road.

### Safety Equipment Required:

The applicant did not provide a list of required safety equipment for this facility. Based on information supplied in other applications, the following equipment is recommended:

Eye Protection  
Hard Hat  
Safety Shoes  
Hearing Protection

### Facility Plot Plan:

The plot plan submitted on December 30, 1994 with the source's Title V Operating Permit Application was designated as confidential information and thus is not included in this Appendix.

### List of Insignificant Activities:

The following list of insignificant activities was provided by the source to assist in the understanding of the facility layout. Since there is no requirement to update such a list, activities may have changed since the last filing.

Insignificant activities and/or sources of emissions as submitted in the application are as follows:

Distillate Storage Vessel  
Condensate Storage Tanks (2 @ 6,384 gallons each)  
Waste Oil Storage Tank  
Gasoline Storage Tank  
Salt Bath Heater  
Emergency Generator

---

**APPENDIX B**  
**Reporting Requirements and Definitions**

with codes ver 9/1/00

Please note that, pursuant to 113(c)(2) of the federal Clean Air Act, any person who knowingly:

- (A) makes any false material statement, representation, or certification in, or omits material information from, or knowingly alters, conceals, or fails to file or maintain any notice, application, record, report, plan, or other document required pursuant to the Act to be either filed or maintained (whether with respect to the requirements imposed by the Administrator or by a State);
- (B) fails to notify or report as required under the Act; or
- (C) falsifies, tampers with, renders inaccurate, or fails to install any monitoring device or method required to be maintained or followed under the Act shall, upon conviction, be punished by a fine pursuant to title 18 of the United States Code, or by imprisonment for not more than 2 years, or both. If a conviction of any person under this paragraph is for a violation committed after a first conviction of such person under this paragraph, the maximum punishment shall be doubled with respect to both the fine and imprisonment.

The permittee must comply with all conditions of this operating permit. Any permit noncompliance constitutes a violation of the Act and is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or for denial of a permit renewal application.

---

The Part 70 Operating Permit program requires three types of reports to be filed for all permits. All required reports must be certified by a responsible official.

**Report #1: Monitoring Deviation Report** (due at least every six months)

*For purposes of this operating permit, the Division is requiring that the monitoring reports are due every six months unless otherwise noted in the permit. All instances of deviations from permit monitoring requirements must be clearly identified in such reports.*

For purposes of this operating permit, monitoring means any condition determined by observation, by data from any monitoring protocol, or by any other monitoring which is required by the permit as well as the recordkeeping associated with that monitoring. This would include, for example, fuel use or process rate monitoring, fuel analyses, and operational or control device parameter monitoring.

**Report #2: Permit Deviation Report (must be reported “promptly”)**

In addition to the monitoring requirements set forth in the permits as discussed above, each and every requirement of the permit is subject to deviation reporting. The reports must address deviations from permit requirements, including those attributable to upset conditions and malfunctions as defined in this Appendix, the probable cause of such deviations, and any corrective actions or preventive measures taken. All deviations from any term or condition of the permit are required to be summarized or referenced in the annual compliance certification.

For purposes of this operating permit, “upset” shall refer to both emergency conditions and upsets. Additional discussion on these conditions is provided later in this Appendix.

*For purposes of this operating permit, the Division is requiring that the permit deviation reports are due every six months unless otherwise noted in the permit.* Where the underlying applicable requirement contains a definition of prompt or otherwise specifies a time frame for reporting deviations, that definition or time frame shall govern. For example, quarterly Excess Emission Reports required by an NSPS or Regulation No. 1, Section IV.

In addition to the monitoring deviations discussed above, included in the meaning of deviation for the purposes of this operating permit are any of the following:

- (1) A situation where emissions exceed an emission limitation or standard contained in the permit;
- (2) A situation where process or control device parameter values demonstrate that an emission limitation or standard contained in the permit has not been met;
- (3) A situation in which observations or data collected demonstrates noncompliance with an emission limitation or standard or any work practice or operating condition required by the permit; or,
- (4) A situation in which an excursion or exceedance as defined in 40CFR Part 64 (the Compliance Assurance Monitoring (CAM) Rule) has occurred.

For reporting purposes, the Division has combined the Monitoring Deviation Report with the Permit Deviation Report. All deviations shall be reported using the following codes:

- |                         |   |
|-------------------------|---|
| <b>1 = Standard:</b>    | When the requirement is an emission limit or standard |
| <b>2 = Process:</b>     | When the requirement is a production/process limit    |
| <b>3 = Monitor:</b>     | When the requirement is monitoring                    |
| <b>4 = Test:</b>        | When the requirement is testing                       |
| <b>5 = Maintenance:</b> | When required maintenance is not performed            |
| <b>6 = Record:</b>      | When the requirement is recordkeeping                 |
| <b>7 = Report:</b>      | When the requirement is reporting                     |

- 8 = CAM:** A situation in which an excursion or exceedance as defined in 40CFR Part 64 (the Compliance Assurance Monitoring (CAM) Rule) has occurred.
- 9 = Other:** When the deviation is not covered by any of the above categories

**Report #3: Compliance Certification (annually, as defined in the permit)**

Submission of compliance certifications with terms and conditions in the permit, including emission limitations, standards, or work practices, is required not less than annually.

Compliance Certifications are intended to state the compliance status of each requirement of the permit over the certification period. They must be based, at a minimum, on the testing and monitoring methods specified in the permit that were conducted during the relevant time period. In addition, if the owner or operator knows of other material information (i.e. information beyond required monitoring that has been specifically assessed in relation to how the information potentially affects compliance status), that information must be identified and addressed in the compliance certification. The compliance certification must include the following:

- The identification of each term or condition of the permit that is the basis of the certification;
- The identification of the method(s) or other means used by the owner or operator for determining the compliance status with each permit term and condition during the certification period and whether such methods or other means provide continuous or intermittent data. Such methods and other means shall include, at a minimum, the methods and means required in the permit. If necessary, the owner or operator also shall identify any other material information that must be included in the certification to comply with section 113(c)(2) of the Federal Clean Air Act, which prohibits knowingly making a false certification or omitting material information;
- The status of compliance with the terms and conditions of the permit, and whether compliance was continuous or intermittent. The certification shall identify each deviation and take it into account in the compliance certification. Note that not all deviations are considered violations.<sup>1</sup>
- Such other facts as the Division may require, consistent with the applicable requirements to which the source is subject, to determine the compliance status of the source.

---

<sup>1</sup> For example, given the various emissions limitations and monitoring requirements to which a source may be subject, a deviation from one requirement may not be a deviation under another requirement which recognizes an exception and/or special circumstances relating to that same event. Further, periods of excess emissions during startup, shutdown and malfunction may not be found to be a violation of an emission limitation or standard where the source adequately shows that any potential deviations as a result of these infrequent periods were minimized to the extent practicable and could not have been prevented through careful planning, design, or were unavoidable to prevent loss of life, personal injury, or severe property damage.

The Certification shall also identify as possible exceptions to compliance any periods during which compliance is required and in which an excursion or exceedance as defined under 40CFR Part 64 (the Compliance Assurance Monitoring (CAM) Rule) has occurred.

Note the requirement that the certification shall identify each deviation and take it into account in the compliance certification. Previously submitted deviation reports, including the deviation report submitted at the time of the annual certification, may be referenced in the compliance certification.

## **Startup, Shutdown, Malfunctions, Emergencies, and Upsets**

Understanding the application of Startup, Shutdown, Malfunctions, Emergency provisions, and the Upset provisions is very important in both the deviation reports and the annual compliance certifications.

### **Startup, Shutdown, and Malfunctions**

Please note that exceedances of some New Source Performance Standards (NSPS) and Maximum Achievable Control Technology (MACT) standards that occur during Startup, Shutdown or Malfunctions may not be considered to be non-compliance since emission limits or standards often do not apply unless specifically stated in the NSPS. Such exceedances must, however, be reported as excess emissions per the NSPS/MACT rules and would still be noted in the deviation report. In regard to compliance certifications, the permittee should be confident of the information related to those deviations when making compliance determinations since they are subject to Division review. The concepts of Startup, Shutdown and Malfunctions also exist for Best Available Control Technology (BACT) sources, but are not applied in the same fashion as for NSPS and MACT sources.

### **Emergencies and Upsets**

Under the Emergency provisions of Part 70 and the Upset provisions of the State regulations, certain operational conditions may act as an affirmative defense against enforcement action if they are properly reported.

### **DEFINITIONS**

**Malfunction** (NSPS) means any sudden, infrequent, and not reasonably preventable failure of air pollution control equipment, process equipment, or a process to operate in a normal or usual manner. Failures that are caused in part by poor maintenance or careless operation are not malfunctions.

**Malfunction** (SIP) means any sudden and unavoidable failure of air pollution control equipment or process equipment or unintended failure of a process to operate in a normal or usual manner. Failures that are primarily caused by poor maintenance, careless operation, or any other preventable upset condition or preventable equipment breakdown shall not be considered malfunctions.

**Emergency** means any situation arising from sudden and reasonably unforeseeable events beyond the control of the source, including acts of God, which situation requires immediate corrective action to restore normal operation, and that causes the source to exceed a technology-based emission limitation under the permit, due to unavoidable increases in emissions attributable to the emergency. An emergency shall not include noncompliance to the extent caused by improperly designed equipment, lack of preventative maintenance, careless or improper operation, or operator error.

**Upset** means an unpredictable failure of air pollution control or process equipment which results in the violation of emission control regulations and which is not due to poor maintenance, improper or careless operations, or is otherwise preventable through exercise of reasonable care.

**APPENDIX B: Monitoring and Permit Deviation Report - Part I**

- Following is the **required** format for the Monitoring and Permit Deviation report to be submitted to the Division on a semi-annual basis unless otherwise noted in the permit. The Table below must be completed for all equipment or processes for which specific Operating Permit terms exist.
- Part II of this Appendix B shows the format and information the Division will require for describing periods of monitoring and permit deviations, or upset or emergency conditions as indicated in the Table below. One Part II Form must be completed for each Deviation. Previously submitted reports (e.g. EER's or Upsets) may be referenced and the form need not be filled out in its entirety.

FACILITY NAME: Canyon Gas Resources – Greasewood Gas Plant

OPERATING PERMIT NO: 95OPRB018

REPORTING PERIOD: \_\_\_\_\_ (see first page of the permit for specific reporting period and dates)

Operating Permit Unit ID	Unit Description	Deviations noted During Period? <sup>1</sup>		Deviation Code <sup>2</sup>	Upset/Emergency Condition Reported During Period?	
		YES	NO		YES	NO
P001	Waukesha Model 7042GL 1,232 HP Natural Gas Fired Internal Combustion Engine, 4-Cycle, Lean Burn, Serial Number 295478.					
P002A&B	Two (2) Ingersol-Rand Model 62SVG 253 HP Natural Gas Fired Internal Combustion Engines, 4-Cycle, Rich Burn, Serial Numbers 6CS555 and 6CS553.

**REPORT CERTIFICATION**

SOURCE NAME: Canyon Gas Resources – Greasewood Gas Plant

FACILITY IDENTIFICATION NUMBER: 1030004

PERMIT NUMBER: 95OPRB018

REPORTING PERIOD: \_\_\_\_\_ (see first page of the permit for specific reporting period and dates)

All information for the Title V Semi-Annual Deviation Reports must be certified by a responsible official. The responsible official signing this certification must be pre-approved by the Division in accordance with Colorado Regulation No. 3, Part A, Section I.B.54. This signed certification document must be packaged with the documents being submitted.

**STATEMENT OF COMPLETENESS**

**I have reviewed the information being submitted in its entirety and, based on information and belief formed after reasonable inquiry, I certify that the statements and information contained in this submittal are true, accurate and complete.**

**Please note that the Colorado Statutes state that any person who knowingly, as defined in Sub-Section 18-1-501(6), C.R.S., makes any false material statement, representation, or certification in this document is guilty of a misdemeanor and may be punished in accordance with the provisions of Sub-Section 25-7 122.1, C.R.S.**

Date Signed

**Note: Deviation reports shall be submitted to the Division at the address given in Appendix D of this permit. No copies need be sent to the U.S. EPA.**

**APPENDIX C**  
**Required Format for Annual Compliance Certification Reports**

Following is the format for the Compliance Certification report to be submitted to the Division and the U.S. EPA annually based on the effective date of the permit. The Table below must be completed for all equipment or processes for which specific Operating Permit terms exist.

FACILITY NAME: Canyon Gas Resources – Greasewood Gas Plant  
 OPERATING PERMIT NO: 95OPRB018  
 REPORTING PERIOD:

1. Facility Status

\_\_\_ During the entire reporting period, this source was in compliance with **ALL** terms and conditions contained in the Permit, each term and condition of which is identified and included by this reference. The method(s) used to determine compliance is/are the method(s) specified in the Permit.

\_\_\_ With the possible exception of the deviations identified in the table below, this source was in compliance with all terms and conditions contained in the Permit, each term and condition of which is identified and included by this reference, during the entire reporting period. The method used to determine compliance for each term and condition is the method specified in the Permit, unless otherwise indicated and described in the deviation report(s) . Note that not all deviations are considered violations.

Operating Permit Unit ID	Unit Description	Deviations Reported <sup>1</sup>		Monitoring Method per Permit? <sup>2</sup>		Was compliance continuous or intermittent? <sup>3</sup>		Was Data Continuous? <sup>4</sup>	
		Previous	Current	YES	NO	Continuous	Intermittent	YES	NO
P001	Solar Centaur Model T-3550 2,732 HP Natural Gas Fired Turbine, Serial Number 1087C41								
P002	Cooper Superior Model 6G825 600 HP Natural Gas Fired Internal Combustion Engine, 4-Cycle, Rich Burn, Serial Number 273179								
P003	Propak System Model H-410 Natural Gas Fired Amine Heater, Rated at 9.0 MMBtu/hr, Serial Number 84214-C								

Operating Permit Unit ID	Unit Description	Deviations Reported <sup>1</sup>		Monitoring Method per Permit? <sup>2</sup>		Was compliance continuous or intermittent? <sup>3</sup>		Was Data Continuous? <sup>4</sup>	
		Previous	Current	YES	NO	Continuous	Intermittent	YES	NO
P004	Sivalls Triethylene Glycol Dehydration Unit, Model GCR-750-450-EL, 19 MMscf/day, with 0.75 MMBtu/hour burner, Serial Number 32.286								
P005	Amine Regeneration Unit, Model Unknown, Serial Number Unknown								
P006	Ethylene Glycol Dehydration Unit, Model Unknown, 18 MMscf/day, with 1.25 MMBtu/hour burner, Serial Number Unknown								
F007	Facility Fugitive Volatile Organic Compound Emissions								
General Conditions									
Insignificant Activities <sup>5</sup>									

<sup>1</sup> If deviations were noted in the previous deviation report (i.e. for the first six months of the annual reporting period), put an “X” under “previous”. If deviations were noted in the current deviation report (i.e. for the last six months of the annual reporting period), put an “X” under “current”. Mark both columns if both apply.

<sup>2</sup> Note whether the method(s) used to determine the compliance status with each term and condition was the method(s) specified in the permit. If it was not, mark “no” and attach additional information/explanation.

<sup>3</sup> Note whether the compliance status with of each term and condition provided was continuous or intermittent. “Intermittent Compliance” can mean either that noncompliance has occurred or that the owner or operator has data sufficient to certify compliance only on an intermittent basis. Certification of intermittent compliance therefore does not necessarily mean that any noncompliance has occurred.

March 2000

The Periodic Monitoring requirements of the Operating Permit program rule are intended to provide assurance that even in the absence of a continuous system of monitoring the Title V source can demonstrate whether it has operated in continuous compliance for the duration of the reporting period. Therefore, if a source 1) conducts all of the monitoring and recordkeeping required in its permit, even if such activities are done periodically and not continuously, and if 2) such monitoring and recordkeeping does not indicate non-compliance, and if 3) the Responsible Official is not aware of any credible evidence that indicates non-compliance, then the Responsible Official can certify that the emission point(s) in question were in continuous compliance during the applicable time period.

<sup>4</sup> Note whether the method(s) used to determine the compliance status with each term and condition provided continuous or intermittent data.

<sup>5</sup> Compliance status for these sources shall be based on a reasonable inquiry using readily available information.

II. Status for Accidental Release Prevention Program:

- A. This facility \_\_\_\_\_ is subject \_\_\_\_\_ is not subject to the provisions of the Accidental Release Prevention Program (Section 112I of the Federal Clean Air Act)
- B. If subject: The facility \_\_\_\_\_ is \_\_\_\_\_ is not in compliance with all the requirements of section 112I.
1. A Risk Management Plan \_\_\_\_\_ will be \_\_\_\_\_ has been submitted to the appropriate authority and/or the designated central location by the required date.

III. Certification

**I have reviewed this certification in its entirety and, based on information and belief formed after reasonable inquiry, I certify that the statements and information contained in this certification are true, accurate and complete.**

**Please note that the Colorado Statutes state that any person who knowingly, as defined in § 18-1-501(6), C.R.S., makes any false material statement, representation, or certification in this document is guilty of a misdemeanor and may be punished in accordance with the provisions of § 25-7 122.1, C.R.S.**

**APPENDIX E**  
**Permit Acronyms**

Listed Alphabetically:

AIRS -	Aerometric Information Retrieval System
AP-42 -	EPA Document Compiling Air Pollutant Emission Factors
APEN -	Air Pollution Emission Notice (State of Colorado)
APCD -	Air Pollution Control Division (State of Colorado)
ASTM -	American Society for Testing and Materials
BACT -	Best Available Control Technology
BTU -	British Thermal Unit
CAA -	Clean Air Act (CAAA = Clean Air Act Amendments)
CCR -	Colorado Code of Regulations
CEM -	Continuous Emissions Monitor
CF -	Cubic Feet (SCF = Standard Cubic Feet)
CFR -	Code of Federal Regulations
CO -	Carbon Monoxide
COM -	Continuous Opacity Monitor
CRS -	Colorado Revised Statute
EPA -	Environmental Protection Agency
FR -	Federal Register
G -	Grams
Gal -	Gallon
HAPs -	Hazardous Air Pollutants
HP -	Horsepower
HP-HR -	Horsepower Hour (G/HP-HR = Grams per Horsepower Hour)
LAER -	Lowest Achievable Emission Rate
LBS -	Pounds
M -	Thousand
MM -	Million
MMscf -	Million Standard Cubic Feet
MMscfd -	Million Standard Cubic Feet per Day
N/A or NA -	Not Applicable
NO <sub>x</sub> -	Nitrogen Oxides
NESHAP -	National Emission Standards for Hazardous Air Pollutants
NSPS -	New Source Performance Standards
PM -	Particulate Matter
PM <sub>10</sub> -	Particulate Matter Under 10 Microns
PSD -	Prevention of Significant Deterioration

PTE -	Potential To Emit
RACT -	Reasonably Available Control Technology
SCC -	Source Classification Code
SCF -	Standard Cubic Feet
SIC -	Standard Industrial Code
SO <sub>2</sub> -	Sulfur Dioxide
TPY -	Tons Per Year
TSP -	Total Suspended Particulate
VOC -	Volatile Organic Compounds

**APPENDIX F**  
**Permit Modifications**

DATE OF REVISION	SECTION NUMBER, CONDITION NUMBER	DESCRIPTION OF REVISION
June 6, 2001	Cover pages	Revised company name and address, contact person, responsible official, phone numbers
	Appendix B and C	Revised to reflect current version
August 16, 2001	Cover pages	Revised company name and address, contact person, responsible official, phone numbers
September 6, 2001	Cover pages	Revised nature of business and SIC
	Appendix B and C	Revised source name
October 31, 2001	Section I, Item 2	Revised Alternative Operating Scenario language to reflect the current version
	Section II, Conditions 1.3, 2.3 and 3.3 and Tables 1, 2 and 3	Revised opacity language to reflect current version
