

Get Vaccinated

against 2009 H1N1

THIRD PRIORITY
General population

SECOND PRIORITY
Pregnant women
Household contacts of children under 6 months of age
Emergency Medical Services
Children age 6 months to 24 years
Non-elderly adults with underlying risk conditions

FIRST PRIORITY
Pregnant women
Household contacts of children under 6 months
Subset of Health Care Workers, with direct patient care responsibilities
Children between 6 months and 4 years of age
Children 5 years to 18 years of age with underlying risk conditions

Priority groups differ for seasonal flu.
Getting vaccinated is the single best way to protect yourself against flu.
