Colorado Environmental Leadership Program Information

The Colorado Environmental Leadership Program (ELP) is a voluntary program designed to recognize and reward organizations and businesses that demonstrate superior environmental performance and, as a result, consistently operate at a level that goes beyond mere compliance with environmental regulations. Membership in the program is open to all types of organizations and businesses from large corporate entities to small businesses, government agencies, nonprofits and academic institutions. To participate in the leadership program, an organization must meet the ELP eligibility related compliance requirements and fit within a specific “tier” of the program. (The criteria is listed below). In exchange, leadership members are provided recognition, and regulatory and non-regulatory benefits and incentives from the state (incentives are specific for each tier level).

TIER	CRITERIA	Recognition
Bronze Achiever	<ul style="list-style-type: none"> •For entities making significant Environmental achievement(s) in improving the environment of Colorado but do not have a functional Environmental Management System (EMS). •Clean compliance record for one year prior to applying to the program. 	•1 year (not renewable)
Silver Partner	<ul style="list-style-type: none"> •For entities who are seeking the Gold Level tier (may or may not have a functional EMS), and are COMMITTED towards meeting the Gold criteria within an agreed upon timeframe, not to exceed three years. •Must meet requirements for “beyond-compliance” activities. •Clean compliance record one year prior to applying to the program. 	•3 year goal
Gold Leader	<ul style="list-style-type: none"> •Currently the Highest Level of State Recognition •Continual environmental improvement goals that are verifiable and measurable (beyond-compliance). •Working towards the goal of sustainability. •Fully functional Environmental Management System. •Clean compliance record three years prior to applying to the program 	3 years (renewable)
