

# Errata Sheet

## Racial and Ethnic Health Disparities in Colorado 2009

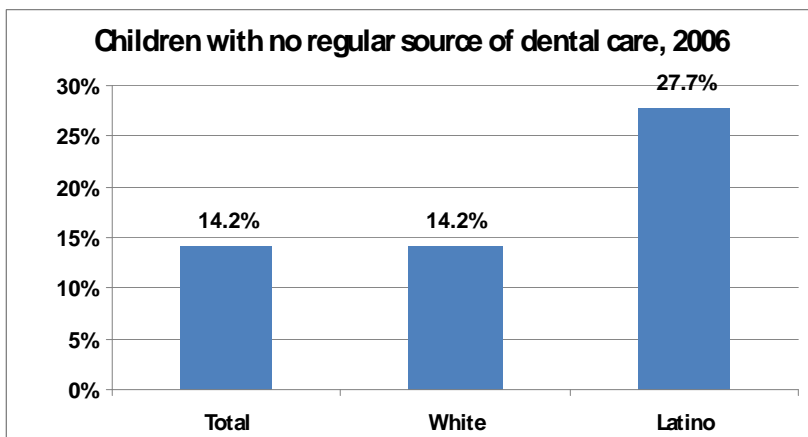

### Perinatal mortality (page 29 figure 7, page 47 figure 6, page 73 figure 6)

The graph in the original report was the perinatal period conditions mortality rate, although closely related, they are not the same. The perinatal mortality rate data, as described in the original text is depicted below.

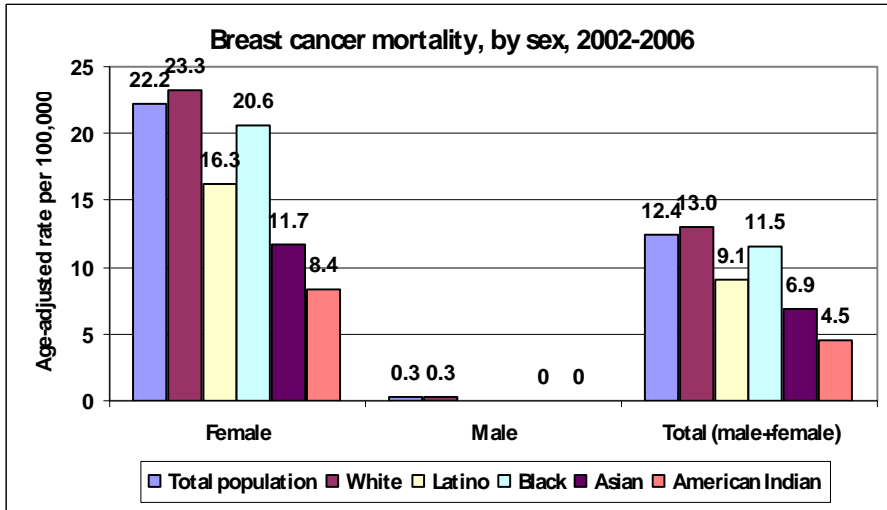

### Children with no regular source of dental care (page 32 figure 16, page 49 figure 15, page 75 figure 15)

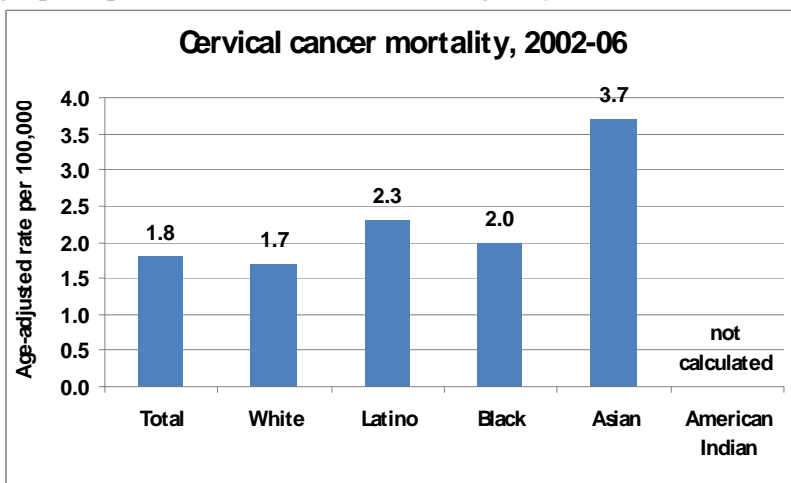

The graph for children with no regular source of dental care in the report is incorrect. Due to small numbers, the proportion of children with no regular source of dental care could not be calculated for Black, Asian or American Indian children. The text describing the graph in the Black and Asian sections should be disregarded. Corrected data for White, Latino and Total population is shown below.

**Breast cancer mortality** (page 36 figure 32, page 53 figure 31, page 66 figure 13, page 77 figure 28)  
 Data presented in the report is breast cancer mortality for the total population; males and females combined. This graph will help clarify sex specific rates for females, males and the total for both sexes.

**Cervical cancer mortality** (page 36 figure 35, page 54 figure 34, page 78 figure 31)  
 The original graph used the total population as the denominator (both males and females). The following graph represents corrected data, using only females in the denominator.

**Prostate cancer mortality** (page 37 figure 37, page 54 figure 36)  
 The original graph used the total population as the denominator (both males and females). The following graph represents corrected data, using only males in the denominator.
