

## John Martin Reservoir – Summary of Hg Concentrations

22 fish sampled = 1 White Bass  
15 Channel Catfish  
6 Wiper

22 Composite Samples = 1 White Bass, composited 1 fish per sample  
15 Channel Catfish, composited 1 fish per sample  
6 Wiper, composited 1 fish per sample

### Results:

For the White Bass samples =  $<0.1$  = all below 0.5

For the Wiper samples = all 6 samples were below the detection limit of 0.1 = all below 0.5

For the Channel Catfish samples = all 15 samples were below the detection limit of 0.1 = all below 0.5
