

**Status of Stormwater Construction Permit Applications
received by the Water Quality Control Division prior to 5/14/2012**

CERTS RECEIVED AND ISSUED ON or PRIOR TO 5/1/2012 ARE LISTED ON "ACTIVE STORMWATER CONSTRUCTION CERTIFICATIONS" LIST

Notes:

- Applications are listed below by the date received in our office. If your application was received after the date range indicated above, it will be processed in the next week's batch and the status reflected in the next update of this list.
- Applications submitted as part of the Notice of Reassignment of Permit Coverage and General Permit Application form are also included.
- This list will be updated every Friday, unless postponed due to closures and official state holidays.
- No faxed or emailed copies of applications are accepted.
- All incomplete applications and/or applications without original signatures are not processed. If the "Permit Certification Effective Date" column indicates "Application Incomplete - Not issued" then your application has been reviewed and found to be missing information and/or original signatures. Typically, you are contacted as soon as the permit is deemed incomplete. Usually, a phone call or an Email notification will be sent (if Email is available) regarding the missing information. Please follow the instructions in the notification – sometimes the entire application must be resubmitted, other times, an email of missing information and maps, etc., is sufficient.
- A date in the "Permit Certification Effective Date" column indicates the date that the permit certification was issued and became effective. Permit certifications are typically mailed out 2 to 3 business days after the "Permit Certification Effective Date." Permit certifications will be issued and mailed to the company/entity name and address indicated in item 1 of the application, and sent to the attention of the signatory indicated in item 9.
- Calling the Water Quality Control Division will not speed up the permitting process. Due to the large volume of requests and limited resources, the Division will be referring all questions related to the status of stormwater construction permits to the list below.
- For all other questions, please call the Stormwater Help Line at (303) 692-3517 or email us at cdphe.wgstorm@state.co.us.
